

Elevated 16-19 Funding

Additional Hours Funding

The primary focus of the additional hours is **more teaching and learning** - you have the **flexibility** to decide what to do with the money, but do be aware that:

- 1) **Tuition** is being heavily encouraged (as is using digital technology and making the most of England's flourishing EdTech market)
- 2) You'll be **expected to produce** an end-of-year report showing the additional hours delivered, and what they've been used for

£354 per student for
40 additional hours of learning!

Use it or lose it - students receiving less hours than planned will be funded for the lower band, with excess funding being recovered on a 2-year lagged basis

No stone unturned - if you're already delivering more hours than the new minimum, you will be expected to proportionally increase hours in future years to provide students with additional learning time.

High Value Courses **Premium**

There is a **further £200 of funding** available per student taking subjects associated with **higher future wages** and a more productive economy, including:

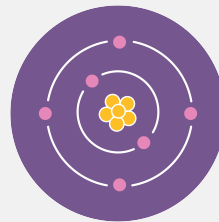

Chemistry
AQA, OCR

Maths
AQA, OCR
EDEXCEL, CIE

Biology
AQA
(Exam Pack available)

Physics
AQA, OCR

In 2022 to 2023, the high value courses premium is rising

from **£400** to **£600** per student

So what can **UP LEARN** do?

Tuition

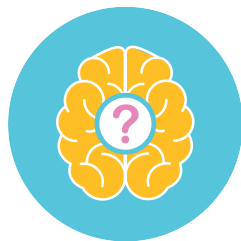

Alongside **24/7 support** from DBS-checked subject-specialists, Up Learn uses cognitive science and AI algorithms. This allows us to provide the **highest quality** content directly mapped to exam board specifications, and **personalised learning**.

Reporting

We can offer 24/7 access to **real-time** student progress data:

- 1) **Track** the amount of hours students have spent on the course, and the **amount of XP** they've gained across every topic in a course
- 2) **Find out** how many videos and progress quizzes they've completed
- 3) Students, teachers, and parents can see progress at the touch of a button

We also offer **courses** in:

Psychology
AQA

Economics
AQA, EDEXCEL
